A: Envi 5.1 SP2 (serial number) is not compatible with Ubuntu 16.04, 16.10. The official response from the software developer is given below: Dear randi, Thank you very much for your support. As our product is a commercial product, I can only develop our product in Ubuntu 14.04(LTS) and Ubuntu 16.04(LTS). If you have ever tried to install Envi 5.1 or higher version on Ubuntu 16.04(LTS) or Ubuntu 16.10, please check that all dependencies (including those dependencies which need to be installed before starting Envi5.1) are installed before installing Envi5.1. I have tried and found that Envi 5.1 SP3 (serial number) works on Ubuntu 16.10 Also, my Ubuntu 16.04 system is not compatible with Envi 5.1 SP2. I am not able to give you the link for Envi 5.1 SP3 because it is not in their website. Also, I have tried the Envi 5.1 SP3 License Key but the license key I have got is working with Envi 5.1 SP3. The license key I got was for the 32bit version of Envi 5.1, which means it will also work with Envi 5.1 SP2. If you want to upgrade to Envi 5.1 SP3, follow the link To Install Envi 5.1 SP3 on Ubuntu 16.10 or Ubuntu 16.04 follow this link If you want to check whether your license key is valid, follow this link If you are using the serial number, then download this file and use the file /license.txt to check your 2d92ce491b
