I recently upgraded my car to the Navi on 800 and I used the custom maps from a tech at another dealership and the maps were fine on my Navi. However, when I attempted to upgrade to the full Navi on 900, I realized the SD card had the custom maps but the Navi would not recognize them. I took the custom maps off and it worked again. If this is a problem for you, I suggest buying your SD card from a store.
