1) Recycle Bin clean operation is really easy. 2) You can use this tool to find which applications used a lot of space on your Recycle Bin. 3) Clean Recycle Bin is a tool to delete contents of the recycle bin. 4) The program cleans your Recycle Bin and deletes files and folders that are stored there. 5) To keep your system free of unnecessary files, use Clean Recycle Bin. Download Clean Recycle Bin v.1.1.0.0 - Download Link Clean Recycle Bin Free allows you to find which applications used a lot of space on your Recycle Bin. Clean Recycle Bin is not affiliated to Microsoft Corporation. It is a freeware.

Facile synthesis of fluorescent nanospheres with high fluorescence intensity. A simple and facile method for the preparation of fluorescent nanospheres is demonstrated by a one-pot reaction between a hydrophobic fluorophore, N-isopropylacrylamide (NIPAM), a water-soluble dye, rhodamine 6G (R6G), and ethylenediamine (EDA). The hydrophobic NIPAM monomers are first adsorbed onto the nanoparticle surfaces by nonspecific interactions. The water-soluble dye molecules are then anchored on the particle surfaces by chemical bonding. The as-prepared fluorescent nanospheres are stable, and exhibit a narrow size distribution. The as-prepared fluorescent nanospheres exhibit excellent photostability, and the fluorescence intensity remains almost unchanged after 30 d of storage.

1. Field of the Invention The present invention relates to cleaning instruments, and in particular, to an instrument used to clear foreign debris from the exterior surface of a vehicle. 2. Description of the Prior Art When a person is driving a vehicle on a roadway and foreign debris in the form of dirt, sand, mud, ice, or other particulate matter enters the vehicle, it becomes necessary to clear the debris from the vehicle. Various methods and devices are presently used to accomplish this purpose. One such method is the use of a brush or the like to scrape the debris off the vehicle. A problem with this method is that some foreign debris may still remain on the vehicle surface and this debris may leave an undesirable mark or scratch when contacted with another surface. Another method is to pull over to the side of the road and scrape the foreign debris off the vehicle. This method

KeyMacro is a very helpful application that allows you to define hotkeys for using special actions in your Windows environment. KeyMacro has been installed on millions of computers across the globe. What it does This small utility enables you to create and manage custom hotkeys that will automate common tasks in your Windows environment. Our experts found it particularly useful for creating hotkeys that will help you clean the Recycle Bin, launch programs or switch between desktop environments with just one click. How it works KeyMacro offers you two modes of operation, the first one is for defining and managing custom hotkeys that you create and the other one is used for defining custom hotkeys that are already available in the Windows Registry. This means that you can either choose a predefined Hotkey, or modify the hotkey's settings and add additional keys to it, that will work on your command line. In order to use the hotkeys, you just need to add them to your custom keyboard layout, and assign them a short or long key, as you like. Main features KeyMacro provides a comprehensive toolkit for creating custom hotkeys. This makes it a very convenient application for users who love to customize their Windows system. Additional features include: – Ability to save and load custom hotkeys. – Support for keyboard layouts that were created with the Layouts tool and written to an external XML file. – Individual hotkey controls that can be used for launching and switching between programs. – Ability to manage the default hotkey settings that are part of Windows 7 and Windows Vista. You can use KeyMacro for free. KEYMACRO Free Download WinRecycle.Me is an advanced software for cleaning Recycle Bin, wiping free space, erasing files and folders. You can remove trash bin items permanently with WinRecycle.Me. Get rid of old documents, unwanted pictures, videos, music, voice memos and many more. WinRecycle.Me can remove all types of files from your Windows PC. Windows Vista users can use WinRecycle.Me to erase files from their desktop and other folders, including Recycle Bin and Windows user profile folders. Whether you are using Windows XP, Windows 7, Windows 8 or Windows 8.1, WinRecycle.Me will help you get rid of unwanted files and applications in few simple clicks. Features of

Clean Recycle Bin is a small software application whose sole purpose is to help you empty the content stored within your Recycle Bin with just one click. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to remove files from the Recycle Bin on the breeze, without having to go through installation steps. How it works You are welcomed by a minimalistic panel that embeds a single function that you can play with. Additionally, you may move the main window to the desired desktop area. The entire deletion process seems nothing more than a piece of cake, as you only to press on the "Clean" button. Performance Since it doesn't require much computer knowledge to work with this small tool, even less experienced users can master the utility with minimum effort. During our testing we have noticed that Clean Recycle Bin accomplishes the deletion operations very quickly and without burdening your computer performance. What it lacks On the downside, the program doesn't integrate advanced features that could help you automatically wipe out the files from the Recycle Bin at a user-defined time, carry out secure deletion operations in order to make sure your sensitive data is permanently shred from your computer, and use a custom hotkey for triggering the cleaning task. Bottom line To sum things up, Clean Recycle Bin proves to be a simplistic piece of software that comprises limited features for helping you remove files from the Recycle Bin with just one click. Description: Clean Recycle Bin is a small software application whose sole purpose is to help you empty the content stored within your Recycle Bin with just one click. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry.
