It supports almost all the popular formats, and will adapt to your output format automatically.Rhinos = Culture=Asp.net+Culture=.net+Winforms I have a question because i can't find anything. I want to bind a List to my Gridview inside my DataEntry form. I already have created the form using the asp.net form designer and put inside it a System.Data.DataTable, created a 2 Dimension array List and filled it with rows of data for example. Now inside the DataEntry form i want to bind a List of Object of my DataTable to my Gridview, i already created the binding but when i submit my form, it says that 6a5afdab4c
