AutoXlsTable for AutoCAD Version 1.03 09/08/2012
AutoXlsTable is the extension of Autodesk™ Excel™ for AutoCAD/MicroStation users. It is designed to import Excel spreadsheet into AutoCAD/MicroStation and update the table to original Excel spreadsheet. 1. AutoXlsTable fully integrates Excel into AutoCAD/MicroStation. AutoXlsTable supports two modes: “AutoXlsTable for AutoCAD” and “AutoXlsTable for MicroStation”. “AutoXlsTable for AutoCAD” can import Excel spreadsheet into AutoCAD/MicroStation and update table to its original Excel spreadsheet. “AutoXlsTable for MicroStation” can import Excel spreadsheet into MicroStation and

update table to its original Excel spreadsheet. 2. AutoXlsTable supports GStar™ IntelliCAD 2008 and above. AutoXlsTable offers the opportunity to Import Excel spreadsheet into AutoCAD/MicroStation and update table to its original Excel spreadsheet. Besides, it also supports Range Import. When users select a range, AutoXlsTable will only import cells from that range. 3. AutoXlsTable supports local area network (LAN). Users can update table whose original Excel spreadsheet is located in another computer of LAN. It's a fast method for collaborative working. 4. AutoXlsTable fully supports Excel text style/size/color change from AutoCAD/MicroStation's. It allows users to override AutoCAD/MicroStation's text style/size/color with Excel's text style/size/color, which supports real-time refresh. 5. AutoXlsTable fully

supports AutoCAD/MicroStation's real-time text boundary drawing in different layers/current drawing. Users can apply individual text style/size/color to each text boundary. 6. AutoXlsTable fully supports AutoCAD/MicroStation's real-time auto-change in text boundary. When drawing a text boundary, AutoCAD/MicroStation will automatically calculate text size/color. For easy maintenance, AutoCAD/MicroStation will automatically save the text size/color configuration in the layer's property table. 7. AutoXlsTable fully supports AutoCAD/MicroStation's real-time text area calculation. You can define a text box with multiple text layers and apply different color to each layer. It's a good
