AutoConfig for Windows 8 is a utility designed to allow you to configure all software and hardware settings of Windows 8 automatically after a simple installation and reboot. To start the process, you should perform a right-click on the affected device and choose the option to “Set up later”.

After a short time, the settings will be transferred to the system, and an automatic reboot should be conducted. Please note that this process should be performed only on systems that do not

require human interaction (like tablets, computers, and smart TVs) and where the installer is enabled. The Windows 8.1 keyboard problems have been many and this configuration utility is ready to handle them all! AutoConfig for Windows 8.1 is a tool designed to help you configure all software and hardware settings of the new operating system automatically after a short installation and reboot. Please note that this is a beta version that enables you to handle all types of problems, although it is hard to say which issues may arise. The process may not work

for all devices (for example, you may not be able to save the settings when using a mouse). Every input device, motherboard, hard disk, and so on can be configured using this utility. This includes everything from adjusting the brightness of your screen to protecting the data on the computer against viruses. The graphics card can be adjusted (for example, you may define whether the system is capable of displaying 4K content), the monitor can be turned on and off, the system clock can be set, and the input device (keyboard, mouse) can be disabled.

Requirements AutoConfig for Windows 8 is compatible with Windows 8.1 and older. Therefore, if you are using the latest operating system version, you will not benefit from all these features. AutoConfig for Windows 8.1 is a beta version. Although we can make no promises about its future. Autorun for Windows 7 is a simple utility that helps you decide whether you should execute the code that you have in a disk, a CD, a DVD, a USB memory stick, etc. During installation, you may decide what you want to do with the files, e.g.

whether you'd like to create an autorun-inf file that makes them work in a simple manner (by going to the directory where you put them), or you prefer to keep the original file untouched. In case the programs in your archives contain registry-related information, the utility enables you
