AutoCAD Product Key is used by hundreds of thousands of designers worldwide to create sophisticated drawings and technical blueprints for construction projects, power plants, spacecraft, medical facilities, and a host of other environments. AutoCAD is also used to create AutoCAD files (which can be opened and viewed by other AutoCAD users), which can be imported into other commercial and free software products such as Microsoft Office, Inventor, and VectorWorks, among others. This article details the features of AutoCAD software and associated service offerings from Autodesk. It also provides details on how AutoCAD software products can be used and configured for specific applications, as well as on the tools and techniques that professional engineers and other AutoCAD users use to enhance their work. AutoCAD and the AutoCAD Classroom AutoCAD and other Autodesk software applications are used by engineers, architects, technicians, and students to develop professional designs, animations, and models. AutoCAD and other software applications are typically purchased by organizations or individuals for use in specific environments. Such organizations or individuals may then license and/or subscribe to the AutoCAD or other software application for a defined period of time. While many AutoCAD and other Autodesk software products can be used for a wide variety of projects, some products are designed and marketed specifically for use in teaching. The AutoCAD Classroom, introduced in 2009, provides tools and training resources for users of AutoCAD as well as several other Autodesk software applications. The AutoCAD Classroom includes content from several Autodesk learning sites and other partners, including university instructors, instructors at major engineering, architecture, and construction colleges, online educational videos, and a library of animated CAD tutorials. The site is designed to provide easy access to content, tools, and resources for AutoCAD users. AutoCAD 2018 for Mac, AutoCAD LT 2018 for Mac, and AutoCAD Architecture for Mac are all included in the AutoCAD Classroom and can be used to create and edit AutoCAD files.
